Summary

Full-Stack & Mobile Developer with 3 years of experience delivering enterprise web platforms and production mobile applications. I build Angular front-ends (including SSR), Flutter apps with BLoC and clean architecture, and PHP/Laravel REST APIs — owning products end to end. Proven record in Arabic-first RTL interfaces, multi-role permission systems and ERP domain logic, for clients in Egypt and Saudi Arabia, backed by a prior career in accounting and auditing.

Technical Skills

Frontend: Angular (incl. SSR), TypeScript, RxJS, NgRx, JavaScript, HTML5, SCSS

Mobile: Flutter, Dart, BLoC/Cubit, GetIt, Dio/Retrofit, Firebase Cloud Messaging, Clean Architecture

Backend: PHP, Laravel, MySQL, REST APIs, JWT Authentication, mPDF

Tools: Git, GitHub, GitLab, Figma, Bootstrap, Tailwind, AI-Augmented Development

Concepts: Responsive Design, RTL/Arabic i18n, Multi-Role Authorization, State Management, Lazy Loading, Technical SEO

Professional Experience

It Plus Programming Solutions – Applications Developer, Full-Stack & Mobile (Sep 2023 – Present)

- Built enterprise Angular applications, from ERP dashboards to an Angular 19 SSR corporate platform with NgRx state management.
- Shipped two production Flutter apps for a Saudi education authority using BLoC, clean architecture and Firebase push notifications.
- Designed Arabic-first RTL interfaces and multi-role permission systems spanning 30+ distinct user roles.
- Built backend REST APIs in PHP/Laravel with JWT authentication, PDF generation and notification systems.
- Led technical SEO on a multilingual site of ~4,500 URLs: canonical/hreflang, Core Web Vitals, structured data and redirect strategy.
- Improved load performance by 30% through lazy loading and code optimization.
- Maintained clean, modular, and scalable code following best practices.

Audit & Tax Accounting Firms – Accounting & Financial Auditing (2021 – 2023)

- Corporate auditing, tax accounting and e-invoicing with the Egyptian Tax Authority — the grounding for building accurate ERP and financial systems.

Key Projects

- QMS Ataa (Flutter) – Quality management app for a Saudi education authority: 18 modules across school visits, standards, indicators, evaluations and corrective plans, with role-scoped access, Arabic RTL and push notifications.

- OPS Ataa (Flutter) – Operational planning app on the same platform: strategic goal chain, work plans, indicators, quarterly and annual evaluations, and PDF export.
- It Plus Corporate Website – Angular 19 with server-side rendering (Express, PM2), multilingual content and technical SEO across ~4,500 URLs. (it-plus.co)
- It Plus Dashboard – Back-office for the hosting and domain business: 40+ modules covering orders, invoices, hosting plans, domains, products and campaigns.
- Bonyan ERP – Company product for finishing and decoration firms, built on the Loom ERP codebase I developed. (bonyan-erp.com)
- Loom ERP – Construction management system (HR, Projects, Clients, Contractors, Custodies, Invoices).
- Ataa Web Platform & Admin – Dual-module education platform (QMS + OPS) with NgRx, admin dashboard and PDF reporting.
- Testat App & Website – Educational ERP with exam creation, Bubble Sheet printing and automatic grading. (testat-app.com)
- CLM – LMS/ERP supporting multi-role users with lecture scheduling and Zoom integration.
- Also delivered: Abis-Hypermarket (e-commerce and supply chain ERP), Faainex (corporate ERP), EPM (printing machinery portfolio), Stride (construction finishes CMS) and YallaEshtary (e-commerce dashboard with delivery zone mapping).

Certifications

- Claude 101 – Anthropic Academy (2026)
- Claude Code in Action – Anthropic Academy (2026)
- Frontend Development – Root Academy
- Angular Development – Information Technology Academy

Education

Bachelor of Commerce – Accounting Department, Helwan University (2021)
