SUMMARY

Software Engineer and Team Lead with 3+ years of experience and a background in accounting (B.Com, Accounting). I lead the development team and own product management for Bonyan ERP, a multi-tenant SaaS ERP with 160+ company workspaces, and designed its double-entry accounting core: chart of accounts, general ledger, period closing and financial statements. Strongest in Angular and TypeScript, and also delivers the PHP/Laravel backend and Flutter mobile parts of complete products; experienced in Arabic-first RTL products for clients in Egypt and Saudi Arabia.

SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, PHP 8, Dart, SQL; Angular (8–21), RxJS, NgRx, Next.js, React, Laravel, Flutter, BLoC
- **Data & Infrastructure:** MySQL, multi-tenant SaaS (database per tenant), REST APIs, JWT, OAuth 2.0 / PKCE, WebSockets (Laravel Reverb, Pusher), Git, GitLab CI, PM2, Cloudflare
- **ERP & Accounting:** Chart of accounts, double-entry general ledger, financial statements (balance sheet, income statement, cash flow, changes in equity, trial balance), period and year-end closing, accounts receivable and payable, fixed assets (IAS 16/36), inventory costing (IAS 2), procure-to-pay and three-way matching, VAT and withholding tax, payroll accruals
- **Leadership & Product:** Team leadership, product management, customer feedback and discovery, specifications and roadmaps, code review, release management, Agile
- **Also:** PDF/Excel reporting (mPDF, PhpSpreadsheet), Arabic RTL and i18n, technical SEO, MCP / AI integration, AI-assisted development (Claude Code, Codex)

EXPERIENCE

It Plus Programming Solutions — Cairo, Egypt **Sep 2023 – Present**
Software Engineer → Team Lead & Product Manager (Bonyan ERP)

- Lead the development team and own product management for Bonyan ERP, a multi-tenant SaaS ERP for project-based companies with 160+ company workspaces; set the roadmap, write specs, review code and run releases.
- Work directly with subscribers to gather feedback and feature requests, and deliver them as configurable per-company options (cash or accrual reporting, per-project tax rules, permission profiles) so one product fits different industries and company structures.
- Built Loom ERP from scratch (projects, BOQ, contractors, custodies, vouchers, HR), the codebase that became Bonyan ERP, and built bonyan-erp.com, the bilingual Next.js website where every customer starts (product tour, cloud and self-hosted pricing, free-trial sign-up, public changelog).
- Designed and delivered Bonyan's accounting core: a 5-level chart of accounts, a double-entry general ledger driven by ~50 automatic posting rules, and full financial statements.
- Added period locking with tamper-evident snapshots, atomic year-end close, an IAS 16/36 fixed-asset register, IAS 2 weighted-average inventory, and procure-to-pay with three-way matching.
- Upgraded the frontend from Angular 8 to Angular 21 in 13 incremental steps with no broken routes, improving speed and maintainability across 231 components.
- Built an MCP gateway that lets AI assistants (Claude, ChatGPT) work inside a tenant's data under OAuth 2.0 + PKCE, 24 scopes and human approval for payments and approvals.
- Shipped two production Flutter apps (iOS and Android) for a Saudi education authority (QMS and OPS) with BLoC, clean architecture, Firebase push notifications and Arabic-first RTL.
- Designed permission systems spanning 30+ user roles, led technical SEO for a ~4,500-URL multilingual Angular 19 SSR site, and improved load performance by 30% through lazy loading and code optimization.

Audit & Tax Accounting Firms — Cairo, Egypt **2021 – 2023**

Accountant & Financial Auditor

- Corporate auditing, tax accounting and e-invoicing with the Egyptian Tax Authority.
- This domain knowledge now drives my ERP work: chart of accounts design, ledgers, tax handling and financial reporting.

SELECTED PROJECTS

- **Bonyan ERP** (bonyan-erp.com) — Multi-tenant SaaS ERP and accounting for project-based companies, and its bilingual marketing website. Angular 21, PHP 8, Laravel 12, MySQL, Next.js.
- **QMS & OPS Ataa** — Two Flutter apps and an Angular web platform for a Saudi education authority: quality management and operational planning.
- **It Plus Corporate Platform** (it-plus.co) — Angular 19 SSR, multilingual, technical SEO across ~4,500 URLs.
- **It Plus Dashboard** — Back-office for a hosting and domain business with 40+ modules.
- **Also delivered** — Testat (exam creation and auto-grading), CLM (LMS with Zoom), Abis Hypermarket, Faainex, EPM, Stride, YallaEshtary and the Orabi Accounting Group website.

EDUCATION

Bachelor of Commerce, Accounting — Helwan University, Egypt **2021**
